

FIONA McKAY JEWELRY – PRODUCT INFORMATION

Effective March 1, 2020

“Celtic Gold”

A proprietary brass alloy (base metal) that was originally developed for a world famous designer, “Celtic Gold” has a luster and color closely resembling high karat gold. It is a great choice for jewelry in that it is inexpensive and offers a choice of colors: gold, red gold, green gold, and white gold. In addition to these features, its best feature is that it is extremely tarnish resistant.

Sterling Silver

Sterling silver is an alloy of silver containing 92.5% by weight of silver and 7.5% by weight of other metals, usually copper. Quality mark is .925.

Fabrication time

All Fiona McKay jewelry is made to order and will take approximately 10 – 14 days to ship. Please email us at sales@fionamckay.com to request a RUSH order and we will do our very best to accommodate it.

Gemstones

All jewels set in Fiona’s jewelry will be Cubic Zirconia gemstones or Swarovski crystals.

Granulation

Granulation is the art of creating a surface pattern on jewelry with tiny balls, and dates back to the third millennium BC. The technique was invented in the Eastern Mediterranean and Egypt and later refined by Etruscan goldsmiths. There are relatively few artists today that have mastered this ancient and stunning technique.

All Fiona McKay jewelry is proudly made in the USA in the Heart of NYC's Jewelry District
